STATEMENT ON HOUSE SCIENCE AND TECHNOLOGY COMMITTEE INTRODUCTION OF THE NATIONAL ARTIFICIAL INTELLIGENCE INITIATIVE ACT

Thursday, March 12, 2020

“Carnegie Mellon is pleased to express strong support for the National Artificial Intelligence Initiative Act of 2020. With this legislation, the House Science and Technology Committee has created a blueprint for ensuring sustained U.S. leadership in AI.

The Initiative supports comprehensive and coordinated research in fundamental discovery as well as advances in key AI application areas such as health, education, transportation, energy and manufacturing. The visionary focus on broad based STEM education, development and ethics will ensure that AI innovations advance economic opportunity and improve the quality of life of Americans.”
